

# Site Managers Safety Training Scheme (SMSTS)

## Who should attend?

- The Site Management Safety Training Scheme is for anyone who manages any aspect of construction work.
- Site managers, property developers and senior foremen in high risk trades will all benefit from the knowledge we can give and what they will learn from each other.
- This course is a requirement of BUILD UK training standards and is recognised throughout the industry as the appropriate training level for site management.

## Course content

- Delegates will feel confident in their responsibilities for running a safe site and will gain an excellent working knowledge of legal requirements that apply to them.
- The content focusses on the health issues faced by those who work in construction as well as the safety challenges that we face on site every day.
- This course contains a wide variety of subject matter but allows enough time to understand the root causes of our construction safety problems, as well as how to solve them.
- The course is packed full of interaction and engagement in order to give the best learning experience to our delegates.

## Assessing learning outcomes

- Delegates are assessed through daily group and individual exercises which will challenge understanding and the ability to implement what has been learned, and a multiple choice examination at the end of the course.
- A good level of written English is required

## Course duration

- 5 days

## Refresher training

- Certification will need to be renewed after 5 years

## Please bring

- Just yourself, we will provide everything you need on the day

## Publication(s)

- CITB publications GE700 and workbook
