

IOSH Working Safely

Who should attend?

- IOSH Working Safely is for everyone who may be exposed to hazards during their working day. These may include physical hazards such as slips, trips and falls, exposure to chemicals or longer-term hazards such as noise, vibration and stress.
- Training for your workforce is all about personal responsibility. Once employers have provided safe ways of working, it is over to your workers to use them. Managers and Directors don't tend to get hurt at work - we need to train those that do...

Course content

- The focus of this engaging, interactive course is on developing skills to identify hazards and understand risk. Once we understand these principles, we can apply them to any workplace situation
- IOSH Working Safely is a one-day course offering all the basics in a high impact interactive package.
- Fantastic IOSH materials created exclusively for the course
- A presentation that's designed to be fun and get people fully involved and interested
- For a full course programme – please see the next page

Assessing learning outcomes

- Delegates must pass 3 hazard identification tests involving different workplace scenarios in addition to a multiple choice test.
- Our tutors are familiar with people who may not be at home in the classroom. If you have any issues with reading and writing, please tell us so we can support you and give you the best possible experience.

Course duration

- 1 day

Refresher training

- Certification should be renewed after 5 years

Please bring

- Just yourself, we will provide everything you need on the day

Publication(s)

- Delegates will be issued with a copy of the IOSH Working Safely Workbook to use and take home

Visit www.hcssafety.co.uk for dates and prices
