

# NEBOSH Health and Safety Management for Construction

## Who is the course for?

The NEBOSH Health and Safety Management for Construction is aimed at Supervisors, Managers and safety professionals within the construction industry who are required to ensure that activities under their control are undertaken safely. It is likely to prove useful for those concerned with the management of buildings who may need to ensure that contractors are working safely. The qualification is also appropriate for supervisors and managers working in other industries such as utilities, and even broadcasting, where temporary workplaces are a feature of their activities.

## Course Benefits

The NEBOSH Health and Safety Management for Construction is established as a leading health and safety award for the construction industry, with over 12,000 successful candidates since 1989.

This level 3 qualification will give delegates a depth of knowledge into the subject matter that will enable them to make their own risk management decisions when they are back in the workplace.

Many larger construction organisations choose the The NEBOSH National Health and Safety Management for Construction as a key part of their supervisory or management development programme. By ensuring that line managers have a sound understanding of the principles of risk management they build an effective safety culture in the company.

*“From NEBOSH’s survey of successful NEBOSH Construction Certificate Students, over 99% of respondents would recommend the qualification to others.”*

## Essential Information
